## PROFILE

I am a **Full Stack Developer** and **App Developer** with hands-on experience in designing and developing scalable web and cross-platform mobile applications using React.js, Flutter, Node.js, Express.js, MongoDB, and RESTful APIs. Skilled in JWT Authentication, Redux Toolkit, MVC Architecture, responsive UI development, and database design. Strong foundation in Data Structures, Algorithms, DBMS, OOP, and problem-solving, with a passion for building secure, high-performance, and user-centric applications.

## EDUCATION

|                                                                                                        |                           |
|--------------------------------------------------------------------------------------------------------|---------------------------|
| <b>B.Tech in Computer Science &amp; Engineering</b><br>Annamacharya Institute of Technology & Sciences | 2024–2027<br>CGPA: 8.7/10 |
| <b>Diploma in Engineering</b><br>Priyadarshini Institute of Technology                                 | 2021–2024<br>90%          |

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, C

**Frontend:** React.js, Flutter, Redux Toolkit, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication

**Databases:** MongoDB Atlas, Mongoose, SQL (Basic)

**Tools:** Git, GitHub, Postman

**Concepts:** DSA, OOP, DBMS, Operating Systems, Computer Networks

## EXPERIENCE

**Full Stack Developer — Techbuggy Pvt. Ltd.** Jul 2025 – Aug 2026

- Developed scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js) with responsive and user-friendly interfaces.
- Designed secure RESTful APIs with JWT authentication, role-based access control (RBAC), bcrypt password hashing, validation, and Express middleware.
- Built reusable React components using Redux Toolkit, React Router, Axios, and Tailwind CSS, and developed backend services using MVC architecture with Mongoose.
- Integrated MongoDB Atlas, Multer, and Cloudinary for database and file management, and deployed production applications using Vercel and Render.

**Full Stack Developer — Smart Bridge** May 2026 – Jul 2026

- Developed full-stack web applications using React.js, Node.js, Express.js, and MongoDB with responsive and scalable architecture.
- Designed and integrated RESTful APIs with CRUD operations, authentication, request validation, and error handling.
- Built reusable React components and implemented MongoDB/Mongoose schemas and efficient database operations.
- Used Git and GitHub for version control, collaborated with team members, debugged application issues, and delivered project features. “

## PROJECTS

**School Management Admin App (Flutter + Node.js + Express.js + MongoDB)** APK Available on Request  
Developed a cross-platform Flutter application integrated with a Node.js, Express.js, and MongoDB backend. Implemented JWT authentication, role-based authorization, student management, attendance tracking, fee management, examination management, results, notifications, dashboard analytics, and secure REST APIs. Used Provider for state management, HTTP package for API integration, Material UI components, and real-time synchronization between mobile and backend services.

**Preparation Placement Assist App (Flutter + Node.js + Express.js + MongoDB)** APK Available on Request

Developed a cross-platform Flutter application designed to help students prepare for placements and secure job opportunities. Implemented JWT authentication, role-based authorization, company-wise interview questions, aptitude and coding practice, resume builder, mock interviews, HR interview preparation, and job application tracking. Integrated Node.js, Express.js, and MongoDB backend with secure REST APIs for user management, preparation content, and application data. Used Provider for state management, HTTP package for API integration, Material UI components, and responsive mobile-first UI design to provide a seamless placement preparation experience.

#### **E-Commerce Platform (MERN Stack)**

[Project Link](#)

Developed a scalable full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB Atlas. Implemented JWT-based authentication, role-based authorization (Admin/User), Redux Toolkit for state management, React Router, Axios, and secure RESTful APIs. Built features including user registration, login, product category management, shopping cart, wishlist, order management, user profiles, and admin dashboard. Integrated Multer and Cloudinary for image uploads, bcrypt for password encryption, CORS, dotenv, and responsive UI using Tailwind CSS with reusable React components following MVC architecture.

#### **Hotel Management System (MERN Stack)**

[Project Link](#)

Designed and developed a full-stack hotel management system using React.js, Node.js, Express.js, and MongoDB Atlas. Implemented JWT authentication, protected routes, admin dashboard, room management, booking management, reservation tracking, customer management, CRUD operations, and RESTful APIs. Used Axios for API integration, Mongoose for database modeling, Tailwind CSS for responsive UI, and followed MVC architecture for scalable backend development.

#### **Police Visitor Management System (MERN Stack)**

[Project Link](#)

Developed a full-stack Police Visitor Management System using React.js, Node.js, Express.js, and MongoDB Atlas to streamline visitor registration and monitoring for police stations. Implemented JWT-based authentication, role-based access control, visitor check-in/check-out, officer management, visitor history, dashboard analytics, secure RESTful APIs, CRUD operations, Axios integration, and responsive user interfaces using Tailwind CSS. Built the application following the MVC architecture to ensure scalability, security, and efficient data management.

#### **College Events Management System (MERN Stack)**

[Project Link](#)

Built a complete event management platform using React.js, Node.js, Express.js, and MongoDB Atlas. Implemented JWT authentication, event creation, registration, participant management, admin dashboard, notifications, role-based access control, and secure REST APIs. Utilized Redux Toolkit, React Router, Axios, Tailwind CSS, and DaisyUI to deliver a responsive and user-friendly interface with efficient frontend-backend communication.

#### **CSE Department Website (MERN Stack)**

[Project Link](#)

Created a department portal using the MERN stack featuring faculty management, student resources, placement information, department achievements, notices, events, galleries, and academic resources. Developed REST APIs with Express.js and Node.js, integrated MongoDB Atlas, implemented CRUD operations, and designed a responsive React interface using Tailwind CSS.

## **STRENGTHS**

---

- Strong problem-solving and Data Structures & Algorithms.
- Full Stack Web and Flutter Mobile Application Development.
- REST API Design, JWT Authentication, MVC Architecture.
- Quick learner with strong debugging and teamwork skills.
